

Questions

Ali is using an IDE (Integrated Development Environment) to write a game. Part of the IDE is an editor that allows Ali to edit the code.

- 1) a) Identify and describe **three** other features of an editor that Ali might use. [6]

Ali has found that the game is not calculating the score correctly. The program is syntactically correct, and no error messages are appearing.

- b) Explain how Ali might use error diagnostics features of the IDE to diagnose the error in the program. [6]
